## Drive Test Engineer – Nicaragua – 2025-07-24

### Descripción

The objective of the Drive Test service is to measure 2G, 3G, 4G, and 5G networks to provide a benchmark for voice and data quality and coverage for specific work performed on the cellular system. To this end, specialized tools will be used to collect and process air interface data. A quality measurement report, if required, detailing the situation in the studied area, will be submitted.

### Responsabilidades

- Conducting field tests («drive tests») to evaluate the coverage and service quality of a 2G, 3G, 4G, and 5G cellular network, using specialized tools.
- Post-processing and analysis of field measurements and preparation of technical reports of results.

### Requisitos

- Initiative / Proactivity
- Empathy
- Goal-Oriented
- Teamwork
- Leadership
- Effective Communication Skills
- Ability to work under pressure
- Sense of Urgency
